

# Your Bottle is Trash

Our whole team is deeply committed to leading by example. We are certified organic and Biodynamic, Napa Green Winery & Vineyard, B Corp, and most recently we became the first TRUE Zero Waste Gold-certified estate winery in Napa County. We reuse, recycle or compost 95% of our “waste” – only 5% goes to landfill. Our industry doesn’t talk much about waste, but on average, 30-50% of winery emissions come from packaging and distribution. That’s why we consider the full supply chain. We have shifted towards recycled content and recycle-friendly packaging. We are decreasing the weight of our Cabernet Sauvignon bottles by 30%. This reduces material use, glass cost, shipment weight, emissions, and post-consumer waste. Did you know that only 30% of glass is recycled? Glass is infinitely recyclable – we just have to build awareness. We are facing a climate crisis, and Spottswoode is taking bold steps to prove that environmental and social leadership are compatible with the highest quality and contribute to a resilient business.

–Beth Novak Milliken, President & CEO, Spottswoode Estate Vineyard & Winery
